

Duane DePoe

This is no good and violates my right to choose what vehicle I want / how I spend my hard earned money!!!!!! My wife and I already did our part for the planet when we bought a new Honda CRV with very low emissions!

Now is not the time for out of their minds, radicals in Washington / ecology to try and force poor retired folks like us to comply with "mandates". We will not comply - turn up your hearing aids and listen to "we the people".
