

Sharon Fox

Why would any lawmakers or citizens want to follow anything California is doing? People have left in droves because of the policies enacted. Poor management: fires-politics-high crime-homeless populations-drug use-highest taxes-NO sense of allowing our abilities to evolve into success which happens with inventions and new technology-the most outrageous example is this summer California grid overload when owners of EVs couldnt charge their vehicles! Rolling blackouts! What has been the most ABUSE of government is dictating what is best for ALL. What about antique/collectable autos? The use of EV ONLY is at worst: WE ARE NOT PREPARED: Charging stations for the most part are NOT RELIABLE-GOOGLE SEARCH: reliable when batteries get wet? fires started? unreliable battery mileage in too hot or too cold of weather? in the event of grid overload what good are EVs? How would citizens be able to escape disasters? 10/11/2022 news has disclosed hacking is possible at EV charging stations-leave the choice of multiple vehicle fuel use available until we citizens are allowed TO VOTE on fuel choices and California PROVES they are superior on all above points!
