

Pete Flatness

If you like California so much, move there and let us here try and get back to living our lives with FREEDOM, and no one sided MANDATES. Slow down on all this EV and climate change hysteria.

Where are your mandates that actually HELP middle class working people?

I live in rural Washington, and gas prices are right now KILLING me. And how am I (middle class, working person) supposed to afford an EV?

Climate change alarmists seem to change science to silence others views.

Where are the ideas of Tom Harris, Dr. Patterson, and Dr. Cliff Mass (and multiple other climate specialists) included in your thinking and policies?

YOU need to slow down on all this climate change

Hype and EV hype,

Now they are talking about all the LIES we were told regarding COVID. They were just pushing an agenda.

The same thing is happening with EV and climate change. Billions of dollars spent without TRUE science being followed.

And who suffers in all this 'bologna', middle class workers!!

Slow down and do this right, not just doing it to do it.

South Dakota' motto: Under God, the people rule.

These mandates are one sided with no support to these 'changes, rules, mandates, etc.' from the PEOPLE!!

Let us VOTE on these changes!!

These 2 proposals are just another way to CONTROL us!!

Just like how Inslee has controlled us for over 900

days with few /no true documented science. Pure control and politics!! And just another way to take away our FREEDOMS!!!

If you like how California is run, move there.

Remember SD motto: Under God, the people rule!

Let us decide If we want our money to go to EV and climate change.
