

Debi and Henry Kelly

We don't understand why this state feels the need to always follow the bad behavior and policies of California and other Leftist areas. This reminds us of parents asking their children, "If Johnny wants to jump off a bridge, will you follow him and do the same?" The citizens of this state deserve far better than the Control Freaks of this state shove down our throats and deplete our wallets. Investigate all the cons of mandating EV's and the cost of removing gas powered vehicles. How are the batteries made and do you really want to do more to support China? How much does it cost to replace an EV battery? We saw an interesting photo of an EV running out of power near a coal mine, and the workers PUSHED it to coal office to recharge it. The irony of this is amazing! You people are trying to put coal, oil and gas products out of business, and the coal miner's are the compassionate ones!

What about the batteries that are exploding when exposed to salt water, such as in Florida? The list goes on and on, but as usual this state and Ecology make the wrong decisions for the state and the residents.

Why is it OK to buy dirty oil from communist companies that will cause more pollution instead of clean oil and gas products that are right here in the USA? This is UN-American, you should all be ashamed!

FYI...get rid of the state gas tax!

Let's Go Brandon!!!
