

Tony Tamaccio

The average EV costs \$66,000.1 This mandate will cost consumers and businesses BILLIONS. Creating the charging infrastructure to support this mandate will be expensive and could take years. The cost of electric grid upgrades needed for new EV charging loads, are unknown and could be in the BILLIONS.

EVERYTHING concerning "climate change" is a complete fraud. The only ones who will benefit from these illegal and unconstitutional mandates are the insiders in government and the private sector that created these phony crises.
