

David Wright

We don't need the so called emission free vehicle. Where are we going to get the power to charge the huge battery that uses up the rare earth elements. If we could get these experts to harvest and manage our forests we could put people to work; produce needed materials; and prevent the forest fires that pollute the atmosphere.

These misguided leaders think they are bigger than the climate. If they had any sense they would try talking to the ONE who controls the climate. Women want to safely and legally murder their unborn children. We want to tell God we can and will decide for ourselves if we are male or female or somewhere in between. We want to call wrong right and right wrong by turning criminals loose to prey on innocent people.

NO. Emission free vehicles will not save the world. But there is ONE who is able and He can and will play hard ball.
