

Kelsie Fowler

What information should Ecology provide in its annual report?

Both quantitative and narrative accounts of how community voice is being elicited and honored.

Breakdown of how funds are being spent by region/city/neighborhood/project

Benefits and successes.

Opportunities for tax payers to be involved and help.

What additional information should be included about spending that is formally supported by a Tribal resolution?

N/A

What additional information should be included about spending that benefits vulnerable populations in overburdened communities?

How many participants and from what vulnerable population contributed feedback.

What should Ecology consider when determining how to evaluate greenhouse gas emissions reductions from projects?

Quantity of greenhouse gas emissions reduced, unintended other consequences, fringe benefits, cost to create change.

What else would you like to share?

There needs to be public listening sessions. Communities need to be heard. Also, public WA institutions should be pressured/required to divest in fossil fuel companies.

Money spent, outcomes, problems and projects need to be mapped and easily searchable by public.
