

## WSDOT Rail, Freight, and Ports Division

Hello, I am a contracts specialist with WSDOT Rail, Freight, and Ports. We are currently developing agreements for projects that use CCA funding, and our funding recipients will need to report their annual carbon emissions reductions. We need to set the term duration of the agreements, and in order to do that we need to know the duration of the annual reporting to the department of ecology. Will the annual reporting requirements end in 2030, 2040, or some other year? If this information could be written into the rule, we would then be able to create a term provision for our funding recipients. Thank you.
