Please do not put a date on this grant like 199. We have two unlined unmonitored landfills here in Skamania County and I am 100% sure they both are releasing methane gases as we speak so how can you put a date on Methan Gas please expand the date to whatever old landfill is damaging our environment and force the county or city or any another owner of these old landfills to start to monitor the air and groundwater we have to do a better job preserving our place to life and we have failed terribly so far.
