

Skye Olson

I am writing to oppose building this data center in East Wenatchee due to the environmental impact and the increased energy demand the center would create. Additionally, the pollution would create further health risks in our community. I encourage you to protect our water, land, and nature as best we can for further generations, rather than building only for the profit of a few. It would be a mistake to allow this project to go forward, both for our environment and the health of our community! Thank you.
