

Emma Paulini

Hello, my name is Emma Paulini and I am a resident of Seattle, WA. Please do not approve Sabey's permit for additional diesel generators in East Wenatchee as currently proposed. These generators would add to air pollution and negatively impact human health on an already overburdened community. I urge Sabey to consider clean alternatives and ensure pollutant monitoring to protect public and environmental health. Especially with the recent devastating fires in eastern Washington, it is unwise and unjust to approve of these diesel generators. Thank you for your attention to this matter.
