

Brittany Anderson

With 35 tons per year nitrogen oxides (NO_x)
6.96 tons per year carbon monoxide (CO)
2.1 tons per year particulate matter (PM)
2.1 tons per year particulate matter (PM₁₀)
2.1 tons per year particulate matter (PM_{2.5})
1.5 tons per year volatile organic compounds (VOC)
0.64 tons per year diesel engine exhaust, particulate (DEEP)
0.02 tons per year sulfur dioxide (SO₂) -

The answer is NO. I am vehemently against this project from expansion. This is a butterfly effect and will absolutely impact the entire region. We are ecologically in debt here in Washington and proceeding with this project is dangerous and catastrophic.
