

Caring for Our Neighbors and Ourselves

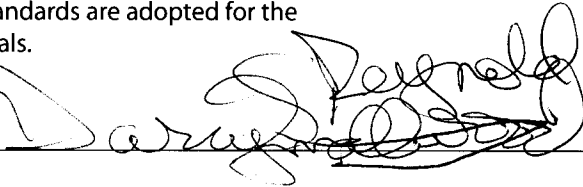

Dear Washington Departments of Ecology and Department of Health officials:

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

Thank you.

I'm concerned about: the current ec and public health crisis

Washington Interfaith Power & Light

www.earthministry.org

Caring for Our Neighbors and Ourselves

Dear Washington Departments of Ecology and Department of Health officials:

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

Thank you. J.J. Johnson Leese [signature]

I'm concerned about: Dupont shirking their

responsibility via generating a
'replacement' to C8, "Gen X"
under a new name (Chemours)
Company

Dispicable if this new product is
just as dangerous. Why no testing???

Caring for Our Neighbors and Ourselves

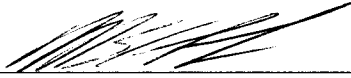

Dear Washington Departments of Ecology and Department of Health officials:

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

Thank you.

I'm concerned about: the environmental and human affects of PFAS.

Where is the corporate responsibility? + that's the CEO's + people who make decisions at the corporate level? They should be prosecuted!

Caring for Our Neighbors and Ourselves

Dear Washington Departments of Ecology and Department of Health officials:

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

Dear Washington Departments of Ecology and Department of Health officials:

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

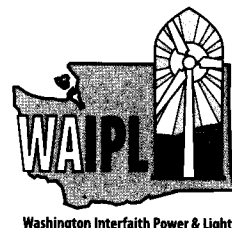

Thank you.

As a person of faith, I urge you to take strong actions to protect our drinking water, food, and communities from the harmful health and environmental impacts of PFAS chemicals.

PFAS (perfluoroalkyl and polyfluoroalkyl substances) contamination of our bodies, homes, and environment is a growing public health crisis. PFAS are in many products from carpets and clothing to cleaners and waxes. These chemicals have no place in products that we come into contact every day in our homes, offices, and schools.

I urge you to act swiftly with your new authority under the Pollution Prevention for Our Future Act (SB 5135) to end the use of this class of chemicals in products, particularly in carpets and upholstery where safer alternatives are already on the market. I also request that strong drinking water and cleanup standards are adopted for the entire class of chemicals.

Thank you. Lanny Shuman [signature]
