Ms.,

Thank you for the excellent work on implementing the Safer Products for Washington Act that will prevent harmful toxic chemicals from polluting our homes, waters and bodies.

I support the list of products Ecology has proposed and request it be expanded. Ecology should address flame retardants in building materials; PFAS in upholstery, floor finishes (waxes/coatings), and apparel; phthalates in food packaging and processing materials, cleaners, and personal care products; and industrial phenolics and PCBs in paints.

It's time we turned off the tap on these chemicals by banning their use in products we are exposed to every day.

Sincerely,

[132 Community Members]
