I'm all for renewal of Univar Permit. Keep the place clean, lots of jobs and so on. I think dept. of Ecology is looking at the wrong task though. Here is a company cleaning up things, you should be having a review every time a new apartment building is built. New apartments allow more people to live here, more people require more schools, more roads, more gas stations, more sewage treatment, more trees to be cut down, higher density living, more electricity is needed, more water is needed and so on.

If you were really concerned about the Ecology of the place you would look at the whole picture and not just what is politicaly in vogue.

Brian
