PFAS Supplemental Comments to those sent on 11 November 2020

Wishing to amplify my earlier comment: Ban import and use of per- and polyfluoroalkyl substances in Washington State, I submit the following for the record:

Ban the import of products containing per- and polyfluoroalkyl substances in Washington State and the use of these products. This would include, but not be limited to, kitchenware, clothing, home decor products and products intended to keep liquids and grease from leakage. Imports should be stopped in by June 2021 and sales of existing products ended by December 31, 2021.

Thank you,

Darlene Schanfald
