Hello my name is Garrett Newkirk and I live on Whidbey Island where our family farm has been operating for over 100 years. Navy Air Station Whidbey island has polluted our area so bad with Pfas and pfoa at more than 190 ppt and your organisations just authorized a ms4 storm water permit for the navy to continue polluting at this level and higher level with zero regard for our farm and our lively hood let alone the salmon habitat that is not more than 1000 ft away.

I believe your agency will do nothing to stop this polluting as we gave relevant comments during the navy ms4 permit that should have been acted upon and your department just rubber stamped the navy's permit so your department should be shut down for not protecting our environment and our lively hood you have done nothing to protect us from the NAVY POLLUTION.
