Subject: Please strengthen the draft PFAS CAP

THIS EMAIL ORIGINATED FROM OUTSIDE THE WASHINGTON STATE EMAIL SYSTEM - Take caution not to open attachments or links unless you know the sender AND were expecting the attachment or the link

Dear Irina Makarow,

Thank you for your good work in developing the 2020 PFAS Chemical Action Plan (CAP) draft and helping ensure Washington State remains a national leader in addressing PFAS chemicals.

I am writing to you because, as a person of faith, I know we have a moral obligation to protect present and future generations from toxic contamination in the products we use every day. Your work of implementing strong standards for PFAS chemicals and cleaning up contaminated sites addresses this call to environmental justice.

I encourage you to incorporate the following values and actions into the draft PFAS Chemical Action Plan:

- **Transparency:** Immediately designate PFAS as a hazardous substance under the Model Toxics Control Act.
- **Accountability:** Require polluters and parties responsible for PFAS production to help pay for clean up of contaminated sites and drinking water.
- **Stewardship:** Pursue testing of PFAS in sludge (biosolids) and develop a sludge standard for PFAS.
- **Responsibility:** Address PFAS chemicals as a class and establish a cleanup standard for all PFAS in 2021. Expand beyond PFOS and PFOA to include the other types of PFAS being considered in the Department of Health's PFAS drinking water standard.
- **Commitment:** Shorten the timeline for regulating other products known to contain PFAS including apparel, waxes and polishes, cosmetics, and children's products. While we commend the agency for taking action through the Safer Products for WA Act, more must be done before its second cycle to address large sources of exposure identified in the CAP.

Personalize your message: The "hidden" costs of not acting to control and clean up toxic chemicals in the environment such as PFAS are surely many times the identified costs. The fact that the impact on human and non-human health and life and the habitability of the environment may be hard to quantify (though it's likely we haven't tried hard enough to do so) does not make it any less real.

Thank you for doing your part to protect Washington's families and environment from toxic PFAS.

Sincerely,

Dr. David Newman
