

Lauralee Carbone

Literally all of us have forever chemicals in our bloodstream. So many health problems have manifested as a result of BPA, phthalates, etc. that disrupt our hormones. Our healthcare system is overloaded with thyroid issues, cancers and more.

As a mother of a child who had cancer I applaud this legislation that is FINALLY being introduced. I would be so proud as a Washingtonian to see it pass.

This information is not new. I read the book OUR STOLEN FUTURE decades ago. Please pass this law ASAP.

Thank you,
