

Barbara McMichael

Dear Washington State Department of Ecology,

I support your proposal to restrict seven new "Priority Chemicals and Chemical Classes." It astounds me that they're currently used in such a wide variety of consumer products, from cookware and household cleaners to tires. YES to including these chemicals in your proposed Cycle 2 action under Safer Products for Washington. I'm proud to live in a state that takes very seriously the strict regulation of toxic chemicals. It's important for the well-being of our children, for salmon, for orcas, and the entire web of life.

Thank you!

Sincerely,

Barbara McMichael
