

Todd Bauernfeind

I have limited knowledge and yield to those that do, such as the many great comments I read. I support complete ban on these chemicals until the future development of other measures. I do work in health care and understand the impact on everyone human and animal in natural eco-system.

I live within eye sight of both airports in the West Plains of Spokane, no action has been taken to test my wells, nor have been able to find how to have my wells tested.

Regards,
Todd Bauernfeind
