

## Mike Ellison

I am commenting on Safer Products for Washington- PFAS Draft Regulatory Determinations Report (Cycle 1.5).

I appreciate your work on dealing with the important public health concern.

My comment refers to Table 2. Initial set of regulatory determinations for PFAS in products identified in our Chemical Action Plan and firefighting PPE. On pages 23-25. I believe that for the consumer products referenced in the table where the Draft Regulatory Determinations column reads Reporting Requirement, as in Chapters 1, 4-6, you change the Regulatory Determinations to include a requirement that the product be labeled as containing PFAS, a brief identification of what PFAS are and a brief summary of the health concerns. The public has a right to know of the public health concerns. Consumers should be trusted with this information.

Thank you for your consideration.

Sincerely,  
Mike Ellison
