

Elisia Dalluge

Hi Kim and other ECY colleagues:

IN RE opinion: Safer Products for Washington Cycle 2

1st thank you for your leadership and genuine care regarding PFAS safety regulations in our products. Thank you for your kindness by including me and letting my voice be recognized. Kudos!!!

ECY has the best Director ever. I love ECY Director Watson. I'm her Erin Brokovich here from AG days. Thanks Laura.

Has anyone done a cross sectional correlational study with other states, California, per se, to see where they are at, what they have banned, what's working and what's not? That will cut a bunch of fat and time wasted for efficiency.

Did you know that the World Health Organization, WHO, is resetting their global standards in re: PFAS levels, to be more consistent with USA and EU?

Also, in an unprecedented move, the FDA recently hit up EWG for our input on toxins and chemicals in food, food packaging, plus. I can forward you that email with link to chime in to see the letter to FDA. Deadline is 12/6/24. Just say the word and okie dokie.

I love, love, love the hard work and combined efforts in the ECY draft. I wish we could move quicker. People are getting sick, diseased, debilitated and dying.

We must be more aggressive in protecting all Washingtonians, in recognizing our "sensitive population" because they are vulnerable and naturally more detrimentally affected by PFAS toxins. And the Coho Salmon... our land and waters, our ecosystem that is being poisoned by this.

I'd like to see instead of grandfathering in, like artificial turf, that the businesses have to submit a consideration for exemption; at ECY discretion. No playing footsies. ECY notification letter distributed and failure to cooperate will result in heavy fines. People are fucking dying!!!

While I recognize, it might be a bit more work, (tell Governor Elect Bob to give ECY more \$\$\$), and there are good businesses who care, I also recognize there are also shitty ones who only care about them making profits to line their personal pockets despite PFAS knowledge of harm/death. Opioids, per se.

For further example: Awhile back a few of my activist groups hit up big private business corporations apprising them of PFAS knowledge and giving them notice of opportunity to do right. Some did immediately, some had a phase out plan and the greedy gave us the middle finger. To just grandfather preexisting would let the greedy slide. No way man!

Please feel free to reach out to me anytime if you have more specific questions that you would like

me to review in the draft, or whatever, so that together we can ensure Safer Products in WA for all Washingtonians.

Again, I am grateful for everything you have done, are doing, and will continue to do. You are appreciated!

Thank you.

Your Friend,

Elisia Dallüge... Lisa from Moses Lake

CC: ECY Director Watson (Please Kudos this team. Thanks L!)
