

Victor Frazier

I have lived all over the world and traveled into many places. The Spokane aquifer and water quality is the best of all the place by far! I do not hesitate to drink tap water here and want to make sure that my grandchildren feel the same way. Vigilance without exorbitant taxation and costs is imperative. We all must be good stewards of our aquifer along with being fiscally responsible. Please work toward these ends and know I am open to discussing and having conversations around balancing the needs and costs in protecting our aquifer. I have a BS in Geography, and an MS in Political Science, I know it's a complex issue.
