

Mary Upshaw

We all know that there is no easy or absolutely safe way to handle the Hanford waste but some solutions are better than others. As a concerned citizen I'm pleased to read of the proposed TBI. As a resident who uses I-90 as my main route for travel and a supporter of Native American rights I believe the TBI should only go forward if the waste is shipped in a solid form. Liquid transport of waste is highly risky and therefore unethical. Thank you.
