

Columbia Riverkeeper members

The U.S. government must act to protect the River from highly radioactive and toxic pollution at the Hanford Nuclear Site. This includes honoring the commitments made in Treaties with Tribal Nations at Hanford, and recognizing that the nuclear waste created at Hanford has caused immeasurable harm to Tribal communities and others who depend on the Columbia River.

I call on the TPA agencies to undertake the most protective cleanup possible, given the enormously high stakes for the Columbia River and everyone it depends on it.
