

## Dwight Rousu

Leaking tanks must be prioritized for removal of all leakable liquids or full retrieval. Leaking tanks cannot be allowed to keep leaking until 2040 or later. USDOE needs to commit to immediate action to stop or reduce the leaks from Single Shell Tanks and dramatically increase the pace of waste retrieval.

- o The priority for which tank farms have waste removed on an accelerated schedule should be based on preventing more tank leakage.

T-Farm, with 2 leaking tanks, should be prioritized to have waste removed. Otherwise, tanks T-101 and T-111 are likely to keep leaking for decades.
