Tom Sicilia

Hello.

My name is Tom Sicilia and I was speaking not as a member of ODOE but as myself so just want to make that distinction.

I wanted to just say first of all that the document is really well well laid out and the the sort of the website format is it makes it easier to navigate. It seems pretty clear that it's intended to not be printed and as such I'd recommend or request or suggest that the this page intentionally blank on the document doesn't need to be there in PDF and should probably it might impact sort of accessibility as someone if someone trying to use a screen reader. Easier just to get that gone.

That was really the only comment I have as a member of the public so thank you for letting me.
