

John Price

The III.Y.3 permit condition concerns Solid Waste Management Units (SWMUs) located with the US Ecology facility, which is located within the Hanford site. The III.Y.3 condition must be modified because the III.Y.3.a.ii condition commits Ecology to making a tentative decision on whether further investigation and cleanup is necessary at those SWMUs. According to the wording of III.Y.3.a.ii Ecology has passed the due date to make a permit modification pursuant to its decision. According to condition III.Y.3.a.ii.b Ecology should make a permit modification that extends the schedule established under condition III.Y.3.a.
