Carol Van Strum

Dear To Whom It May Concern,

I appreciate Washington State Department of Ecology (Ecology) for enforcing the Tri-Party Agreement and Consent Decree and strongly pushing back on USDOE's proposed Dual Path Approach. Ecology's oversight protects workers, communities, Tribal Nations, future generations, and the Columbia River. I commend Ecology for keeping the focus on the Low-Activity Waste Facility and vitrifying tank waste from 200 East.

The following comments apply to two comment periods:
1. Class 2 RCRA Permit Mod Request for the Low-Activity Waste Pretreatment System, Operating Unit Group 1 (AR-41147)
2. Class 3 RCRA Permit Mod Request for the Waste Treatment and Immobilization Plant, Operating Unit Group 10 (AR-41146)

Don't proceed with the Dual Path Approach. Reject USDOE's Dual Path Approach permit modification requests and stick to the plan for feeding the Low-Activity Waste vitrification plant with pretreated liquid tank waste. Do not allow USDOE to re-route any of the LAW waste feed for grouting and disposal offsite. Focus on getting both melters in the LAW Facility operating at optimal throughput.
