

Vashon Climate Action Group

I'm with Vashon Climate Action Group and I want to say that I strongly support the comments that were made by the woman from Earthjustice. The idea of not setting a set value for methane leakage without allowing new science to change it, I think is extremely important and also the idea of the safety factor, I was very pleased to hear the things that she had to say and thank you for the work that you're doing on this.
