

Tad Anderson

Thanks for a good webinar this morning and for helping me participate. Regarding Life Cycle Analysis, Ecology proposes to rely heavily on ISO 14040 and ISO 14044. I would like access to these documents. I can Google those words and I get a blizzard of confusing links, none of which seem to bring me to the actual documents. Can you provide me with direct links to the latest revision of ISO 14040 and ISO 14044 ?
