Okay, can you hear me? Yes, sir. Okay. I just have a comment, or concern that rule 442 got thrown out in court, because indirect emissions of that rule I'd just hate to see that happened again to this rule. And just wondering, what's different? Well, that's a question. Sorry. But that's all I have to say, I just have a concern about that and I'd hate to see all your hard work, get thrown out of court again for the same issue. Thank you.
