

## City of Chelan Public Utilities Department

*Webinar Poll Responses* - I feel more informed now but going into this webinar I wasn't really clear what an industrial facility would be defined as and there wasn't good information on the web site to help me understand what would be covered and how this rule may be applied. I'll accept that perhaps I was just too new to this issue.

I think there was an assumption that the underlying purpose and terms used by Ecology were widely understood, but I don;t think they are.

I think it is clearer but more examples of what is covered and not would be helpful - especially what an industrial project is.
