

Friends of the Earth (FoE)

Please accept the attached petition from 1,040 members and activists of Friends of the Earth who reside in Washington State. Friends of the Earth joins this petition as an organization and calls on the Department of Ecology to do all it can to phase out all net pen finfish farming in the state. Thank you for the opportunity to weigh in on this important policy document.

Dear Department of Ecology:

I am writing to voice my concern over the Department's continued support for the net pen industry through its recent publication of the draft Guidance for Commercial Marine Net Pen Aquaculture in Washington. I was deeply concerned over the poor public notice and comment process initially undertaken by the Department and was relieved to hear that officials extended the public comment period to August 5. Thank you for heeding public outcry and allowing a meaningful opportunity to weigh in on this process.

I want to use this commenting opportunity to voice my opposition to allowing private corporations to mar, privatize, and profit off our public waters for farming fish in net pens. I urge the Department to use its authority to heavily scrutinize net pens in the state by denying permits and increasing strict regulatory protections for our sound and our salmon. Pharmaceuticals, diseases, parasites, excess nutrients, and other water quality concerns are paramount with net pen operations. These issues are not mitigated by simply raising a native finfish species – even if the stock is sterile/all-female. The only way to truly protect our coastline and wildlife from the harms of industrial ocean fish farming is to remove the operations from our waters entirely.

Industrial ocean fish farming has been polluting our waters and harming our wild, native salmon for far too long. Please do all you can to end this destructive industry in our public waterways.

Sincerely,
