cristie coffing

My name is Cristie Coffing. I live at 8054 Maple Ave SE, Snoqualmie. I will be directly affected by the proposed BESS project. The following has been noted in other studies regarding similar facilities. I hope you will study the environmental effects thoroughly.

- environmental effects are proven to be disastrous if a fire or a leak occurs
- the noise is detrimental to habitat species and humans
- the project is located in close proximity to a playground and homes
- the watershed and river are at risk of contamination

This is a poor choice of location.

Thank you for your consideration.

Cristie Coffing
