

Judy Haugness

Please do not allow these Lithium Battery projects on Farmland, Residential area, near schools, Hospitals or heavy populated areas

They are expecting our Fire Dept to manage and handle all emergencies. . Our local FD are made up of all volunteer individuals. 3 actual employed Fire employees. Our community would not have enough time to evacuate when there is an emergency. Too much danger for our waterways.

Build them only in Heavy industrial zoned land and away from all the above.

Think of the citizens
