

## Ashleigh Moe

I am a resident in Sedro Woolley, Wa and I am extremely concerned about the environmental impacts to our already dying farmlands and local food supplies. Additionally, when I was listening to the company during one of the Town Hall meetings a while back, they literally said "we will cross that bridge if we get to it" when discussing emergency evacuations for fires and toxic airs. In my opinion, that is insanity that we are still even discussing the potential of these facilities when the company themselves cannot protect the community members or land. We will regret this if we move forward. We will lose salmon, wildlife, food and farmlands. We must stop our precious land from being destroyed.
