

Ed Lam

1. "What is the site-specific thermal runaway and fire response plan, and has the local fire department reviewed and signed off on it?" Unless you are using the latest Sodium Ion batteries, Lithium ion has been known to be problematic.
2. "What are the decommissioning and end-of-life battery disposal/recycling obligations, and is there a bonded financial guarantee behind them?"
3. "What cumulative impact analysis was done for water resources and groundwater — specifically fire suppression runoff and any chemical leaching, not just routine operations?"
