

Winnie Stephenson

To the Department of Ecology, Clean Energy Coordination:

My name is Winnie Stephenson and I live at 7805 Melrose Ln SE Snoqualmie WA 98065. I am writing to submit a scoping comment on the Programmatic Environmental Impact Statement for stand-alone, utility-scale, lithium-ion battery energy storage system facilities in Washington (Publication 26-06-017).

I am commenting because a stand-alone BESS facility is proposed in the Snoqualmie Valley, and Ecology has said that project-level reviews will tier to this PEIS. Ecology has asked for input on questions for the study. My comment addresses the following:

Q2 · Geographic scope — Where the study assumes batteries will go.

Ecology promised to hear from local communities and it's important to take what our communities are saying about where we live seriously in order to ensure this study is done properly. I ask that the PEIS's geographic-scope assumptions explicitly account for proximity to homes, schools, and hospitals; wildland-urban interface and wildfire-prone areas; seismic hazard zones and floodplains; areas dependent on private wells; and communities with limited evacuation routes — and that proximity to existing infrastructure not be treated as a proxy for suitability.

Q4 · Mitigation — The steps Ecology should require to reduce the harm.

The siting and design considerations Ecology plans to give developers from the study must include minimum distances from homes, schools, hospitals, and drinking-water wells that are proven to be safe for the surrounding community, not just general guidelines. I ask that the PEIS identify concrete mitigation measures, including minimum setbacks from homes, schools, hospitals, and drinking-water wells; large-scale fire testing (UL 9540A) and compliance with the current edition of NFPA 855 regardless of state adoption status; funded emergency-response plans, training, and equipment for local fire districts before operation; containment and disposal plans for fire-suppression water; enforceable nighttime noise limits at the nearest residence; and decommissioning and financial-assurance requirements.

This is personal for my household. I live 1–2 miles from the proposed site. In an emergency my household would evacuate via Snoqualmie Parkway, along with everyone else who depends on that road.

Because Ecology itself says stand-alone facilities "could be sited in a variety of locations," including near cities, the PEIS should not assume facilities will be far from people. I ask that Ecology treat proximity to residents as a defining condition of the analysis, and that the Draft PEIS state plainly which impacts cannot be mitigated below significance, so that lead agencies and the public are not left to guess.

Thank you for considering this comment. Please include it in the scoping record. Our community is following this PEIS closely and intends to participate in the Draft PEIS comment period.

Sincerely,
Winnie Stephenson
