everyone is confused about recycling. it needs to be very clear and the same throughout the region as to what can be recycled. mixed source is a terrible mistake. recycling should be SINGLE source. less contamination. blitz media with a slogan - make it simple like "give a hoot - don't pollute". recycling containers do not indicate what is being recycled. they become trash containers. also blitz all media to keep food waste out of landfill. King Co. a long time ago encouraged home food waste composting.....make it fun for children especially.
