

Jean Jarecki

I am strongly against the all in for Biosoilds without consent or consideration of the toxicity to our land, wells, rivers, fish and wildlife. Why in Gods name would you even consider poisoning what little clean Earth we have. You know besides human waste, there are pesticides, heavy metals, fire retardants, medical waste, nitrates, and pharmaceuticals.

It is time to look into a thermo incinerator like Switzerland has which eliminates all toxins.

Sincerely

Jeanne Jarecki
