

Snohomish County Health Department (Megan Bertolacci)

Compost Exemptions

The Snohomish County would like clarification on if the 20% food waste is calculated by weight, volume, or another measure.

The Snohomish County Health Department is not aware of an 8-hour compost training, only the 40-hour CFOT training. Is there an 8-hour training that is offered so operators can meet this requirement?

Piles

Would the new piles exemption apply to collection sites that take land clearing debris, or just yard debris?

Contamination Limits

The Snohomish County Health Department would like clarification on if the percentage of permissible contamination is by weight, volume or another measure.

Housekeeping

What lab accreditation would meet the requirements?

Are trainings also provided in other languages, in addition to the operations plan?
