

## The Lyne Family Adopt-a-Highway team (Madeline Lyne)

Hello, I've been cleaning up sections of Highway 14 in Camas and Washougal since 2019 with Adopt-a-Highway. There's definitely a need to include construction/landscaping debris and vehicle-related debris. Plastic sheeting, buckets, gloves (both plastic and cloth), roofing, large plastic bags, various building materials, lumber tags, zip ties, cigarettes, truck bumpers, tire treads; you name it we see it! The last 6-8 years, I think it's been getting worse and it's a horrible reflection on the NW. To me it says we don't care about our environment. I can't imagine tourists coming for the first time and seeing the disgusting amount of trash on our roadways. Please see the attached photos of some things we've found over the years. How much of this \$ do city governments even use or ask for? An increase in this tax would be good but the \$ needs to be used efficiently and effectively. Does any of this tax \$ go to Adopt-a-Highway? There are many signs posted of groups that are obviously inactive. This could be a more effective program if more organized attention is given to it. Yes increase the tax but please make sure the funds are going to the most effective means of making a difference in our filthy roadways.

IMPORTANT INFORMATION
