

Glass Packaging Institute (Avery Makrakis)

Section 173-950-120 Individual Producer Plan, Subsection (2)(g)(ii)

GPI has a concern based on the preliminary reimbursement process from Colorado that glass processors, who are an integral part of the recycling processing of commingled glass, are not eligible to be compensated directly for processing residual glass from primary MRFs. To the extent that state law covers processing, entities such as glass processors that perform the processing of covered glass materials should be eligible for reimbursement and not be expected to rely on haulers to pay them.

Section 173-950-030 Definitions

GPI believes there is enough of a difference between "covered material" and "covered material type" that the regulations should include "covered material type" to be consistent with statute.
