

Diane Schaffer

Everything formulated in this plan makes perfect sense. I previously lived in two other states with "bottle bills", and after the initial "confusion" some residents had to the programs, everything became second nature and routine. I strongly urge you to carefully consider how you will present this to the legislature and ordinary residents. Please emphasize the health aspects (ie less microplastics in our ecosystem-> bodies, keeps our neighborhoods and roads cleaner, great way for schools, clubs, etc to fundraise by collecting, reduced garbage recycling fees for homeowners, and that's it is NOT a tax. Keep up the good work keeping our State cleaner and healthier.
