

Leslie Lutz

I'm in favor of the bottle bill, and I agree that convenience will be important to most people, because the human race is pretty lazy. I collect my recyclables that don't go into the curbside and mail them in, so that's not convenient and I still do it because I don't want my grandchildren to one day be living in piles of garbage. I'm concerned that the legislature will use any excuse to axe the bill, which would be shortsighted.
