

## Steven Friederich

The plan details the use of a physical Joint Information Center. This plan should really be updated to include modern technology, such as Zoom and Teams and the use of a Joint Information System. For instance, it still talks about using fax machines. What media really uses fax machines these days? Annex 2 Notifications is also out of date. For instance, KBKW no longer has a news room and it's the only media outlet listed. The phone numbers and contacts on this list should be double checked for accuracy.
