

NRC WA PRC Application

March 16, 2026

Attachment F-9

Shoreline Cleanup

NRC meets the requirements of WAC 173-182-522 for shoreline cleanup by maintaining:

- A large, trained West Coast workforce
- A dedicated shoreline supervisory cadre
- Multiple equipment staging locations
- Inventories that exceed state minimum requirements
- Surge capacity through established vendors and the Independent Contractor Network (ICN)
- Rapid deployment and mobilization logistics
- Supply chains capable of sustaining shoreline cleanup operations for as long as Unified Command requires

Our distributed personnel and multi-location equipment posture ensure shoreline capability that meets or exceeds WAC standards for staffing, equipment, supervision, training, data management, and long-term operational support.

Shoreline Cleanup Personnel

NRC has a combined total of approximately 500 full and part-time employees located on the West Coast. NRC Project Managers, Supervisors and Foremen, totaling over 100 on the West Coast alone, are trained in shoreline clean-up and supervision topics including:

- Safety
- Waste Management
- Helicopter Safety
- ATV Safety
- Wildlife Concerns
- Passive Recovery Tactics
- Mechanical Recovery Tactics
- Case Histories

NRC Project Managers, Supervisors and Foremen are supplied with company issued cell phones – providing shoreline supervisors the ability to communicate directly with the ICP either by voice or text, as well as send and receive photos and documents.

In the event of a spill response operation requiring large numbers of shoreline cleanup personnel, these personnel will be dispatched as available from various regional offices. NRC uses the most expeditious mode of transportation available to get response personnel on scene,

including air, highway, rail or water transportation (or any combination thereof) as approved by its response contract client. Historically, this has included chartering aircraft, buses and/or renting personnel vans.

To maintain the flexibility required to perform a variety of project sizes and scopes, NRC also regularly works with a variety of vendors to augment its full-time workforce with additional HAZWOPER trained personnel. NRC's on-going relationship with these vendors ensures ready access to additional personnel for emergency response operations, including shoreline cleanup. In addition, NRC also has access to over 500 HAZWOPER trained personnel through its nationwide Independent Contractor Network (ICN) vendors.

If requested to train additional personnel, NRC can provide trainers for both HAZWOPER and response operations training. The exact timeframe to accomplish the training is dependent on travel time to the site, the level of training required and the availability of classroom space. Given its access to these extensive personnel resources, NRC can support and conduct extensive response operations, including shoreline cleanup, for an indefinite period of time

Shoreline Equipment:

NRC maintains a substantial inventory of snare to provide immediate access to passive recovery capabilities, which is well in excess of the 9 miles required per regulation WAC 173-182, as demonstrated by the following current inventory:

NRC Office	Storage	Totes	Bales	Feet	Miles
Seattle	Yard, Container	0	1,750	87,500	16.57
Spokane	Warehouse	60	1,200	60,000	11.36
Pasco	Warehouse	188	2,760	188,000	35.61
Alameda	Warehouse	20	400	20,000	3.79
Long Beach	Warehouse	40	800	40,000	7.58
Total		308	7,910	395,500	

NRC also maintains a Shoreline Cleanup Trailer in its Seattle office yard (WRRL #28468) stocked with PPE, materials, tools and supplies sufficient to outfit between 100 and 80 cleanup personnel for three to five days respectively - see attached Inventory for details. NRC can support cleanup operations for a minimum of 14 additional days with materials and supplies, including sorbents, hand tools, PPE, and debris bags, as needed through standard inventory stocks maintained in NRC Seattle, Portland, Spokane and Pasco office warehouses. NRC can also access additional materials and supplies within a maximum of 24-hours through NRC's prearranged relationships with national vendors, with warehouses in Seattle and Portland. In addition, NRC's dedicated products sales group based in AK can also source materials and supplies nationally as needed.

Shoreline Trailer Base Inventory Some items may be stored in alternate locations

ID	TYPE	DESCRIPTION	UOM	QUANTITY
1	COMMUNICATIONS	INTRINSICALLY SAFE RADIO (2900-Office)*	EACH	12
2	COMMUNICATIONS	UHF BASE UNIT (2900-Office)*	EACH	1
3	COMMUNICATIONS	VHF BASE UNIT (2900-Office)*	EACH	1
4	DECON AND HAZMAT	1 GALLON OF SIMPLE GREEN	EACH	6
