Identify all staff that would be expected to provide oil spill response services for your company and for potential contracted plan holders.

Job titles and duties/roles must be defined in the PRC application and align with the roster. Define what these positions are responsible for in terms of oil spill response activities. They must include appropriate training including how you train on hazardous materials, contingency plans, GRPs and other relevant oil spill response methods.

Homebase is the general location (City) the person/worker lives and based from.

Tactical Role, provide a general tactical role for the employee, on-water response, booming, recovery, etc. Shoreline Assessment, Supervisor, etc.

If you are applying to fill specific Spill Management Team (SMT) positions they must be defined and training must be explained in the PRC application for those positions. SMT positions include any positions in a typical ICS structure.

Most commonly identified positions include: Responsible Party Incident Commander (RPIC), Safety Office (SO), Public Information Officer (PIO), Liaison Officer (LNO), Operations Section Chief (OSC), Planning Section Chief (PSC),

Situation Unit Leader (SUL), Wildlife Branch Director (WBD), Resource Unit Leader (RUL), Documentation Unit Leader (DUL), Environmental Unit Leader (EUL), Logistics Section Chief (LSC), Finance Section Chief (FSC). You can

also identify staffing positions under the section chief or lead. Identifying SMT positions is not required as part of a PRC application but if you assign people in plan holder drills and spills in specific positions they must be listed.
